Re: Notice of Potential Liability at Solvents Recovery Service  
of New England in Southington, Connecticut (the "Site")

Dear Mr. Baxt:

This letter serves to notify you of the potential liability which your company has or may have incurred under Section 107(a) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) with respect to the above-referenced site. The United States Environmental Protection Agency (EPA), by this letter, requests your voluntary participation in undertaking cleanup activities at the Site, and requests that you make restitution by payment of the costs incurred by the United States in its investigation and response activities at the Site.

The Solvents Recovery Service of New England Superfund site is located on Lazy Lane in Southington, Connecticut approximately ten miles southwest of Hartford. Solvents Recovery Service of New England, Inc. (SRSNE) operated a treatment, reclamation, disposal, and storage facility for Hazardous Waste Management at the Site from 1955 to 1991. When the Site was placed on the National Priorities List in 1983, it became eligible for cleanup under the CERCLA program (also known as Superfund). To prepare for the overall remediation of the Site, EPA is conducting a Remedial Investigation to identify the nature and extent of the contamination at the Site and a Feasibility Study to analyze alternative cleanup strategies for the Site.

**NOTICE OF POTENTIAL LIABILITY AND**  
**REQUEST FOR PARTICIPATION IN CLEANUP ACTIVITIES**

The United States Environmental Protection Agency has documented the release and threatened release of hazardous substances, pollutants and contaminants at the above-referenced site. EPA has spent and is considering spending additional public funds on actions to investigate and control such releases or threatened releases at the Site.
